

There's a life behind every test

The **BD Veritor™ Plus System** enhances
COVID-19* testing at the point of care

Discover the portable, easy-to-use
BD Veritor™ Plus System. It provides
reliable results in just 15 minutes.

* This product has not been FDA cleared or approved; but has been authorized by FDA under an EUA for use by authorized laboratories.

- This product has been authorized only for the detection of proteins from SARS-CoV-2, not for any other viruses or pathogens; and
- This product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

Get ready for COVID-19 testing

COVID-19
(SARS-CoV-2)

When your patients need reliable, rapid COVID-19 testing, turn to the **BD Veritor™ Plus System**. It offers dependable results at the point of care in a simple-to-operate portable instrument.

Simplifies the testing process

- Helps reduce manual test processing errors with its easy operation and single-button functionality

Achieves reliable, rapid results

- Displays easy-to-read digital results for COVID-19 in 15 minutes¹: “CoV2: +” for positive; “CoV2: -” for negative
- Records results on a secured internal drive
- Helps improve test performance with advanced particle technology*

Delivers workflow efficiency

- Adapts easily to your workflow by offering 2 operational modes
 - » **Walk Away**: the test device is inserted immediately into the Analyzer so staff can multitask while the sample incubates (15 minutes)
 - » **Analyze Now**: the test device is inserted after the incubation time is complete, allowing batches of samples to be tested at once (results in seconds)

Provides result traceability

- Stores or downloads the lot number, patient/specimen ID, operator ID, and test records using the BD Veritor™ InfoScan module
- Offers result printing capabilities via USB port

*In comparison to visually read tests

Clinical performance vs RT-PCR¹

PPA [†]	NPA [‡]	Results In
84% (95% CI, 67%-93%)	100% (95% CI, 98%-100%)	15

[†]positive percent agreement
[‡]negative percent agreement

COVID-19 result in 15 minutes

A negative result does not rule out COVID-19 infection and should not be used as the sole basis for treatment or patient management decisions, including infection control decisions. A negative result should be considered in the context of a patient's recent exposures, history, and the presence of clinical signs and symptoms consistent with COVID-19, and confirmed with a molecular assay, if necessary, for patient management. For additional information, please refer to the HCP fact sheet.
