

There's a life behind every test

COVID-19, Flu A and Flu B with one assay

The **BD Veritor™ Plus System** now allows more options on a single assay, allowing you to test for **COVID-19, Flu A and Flu B** with just one sample. With multiple testing modes and workflow efficiencies, the Analyzer is more versatile than ever.

One sample. Three reliable results.

- *These products have not been FDA cleared or approved; but have been authorized by FDA under EUA for use by authorized laboratories
- The BD Veritor™ System for Rapid Detection of SARS-CoV-2 & Flu A+B has been authorized only for the detection of proteins from SARS-CoV-2, influenza A and influenza B, not for any other viruses or pathogens; the BD Veritor™ System for Rapid Detection of SARS-CoV-2 has been authorized only for the detection of proteins from SARS-CoV-2, not for any other viruses or pathogens; and,
- These products are only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

Get more answers with every sample.

COVID-19, Flu A and Flu B

Test for **COVID-19***, **Flu A** and **Flu B** with a single sample, using the 3-in-1 assay from the **BD Veritor™ Plus System**.

Simplifies the testing process

- May help reduce manual test processing errors with its easy operation and single-button functionality

Achieves reliable, rapid results

- Displays easy-to-read digital results for COVID-19 and Flu A+B in 15 minutes¹:
 - » “CoV2: +” for positive; “CoV2: -” for negative
 - » “FLU A: +” for positive; “FLU A: -” for negative
 - » “FLU B: +” for positive; “FLU B: -” for negative
- Provides clear, objective results by correcting for nonspecific binding and detecting positives not recognized by the unaided eye¹

Delivers workflow efficiency

- Adapts easily to your workflow by offering 2 operational modes
 - » **Walk Away:** the test device is inserted immediately into the Analyzer so staff can multitask while the sample incubates (15 minutes)
 - » **Analyze Now:** the test device is inserted after the incubation time is complete, allowing batches of samples to be tested (results in seconds)

Provides result traceability

- Captures or downloads the lot number, patient/specimen ID, operator ID, and test records using the BD Veritor™ InfoWiFi module

Clinical performance vs RT-PCR¹

	PPA	NPA	Results in
SARS-CoV-2	86.7% (95% CI, 75.8%-93.1%)	99.5% (95% CI, 97.4%-99.9%)	
Influenza A	82.7% (95% CI, 74.9%-88.5%)	97.5% (95% CI, 95.7%-98.5%)	
Influenza B	80.7% (95% CI, 70.3%-88.1%)	98.2% (95% CI, 95.7%-99.3%)	

SARS-CoV-2, Flu A and Flu B results in 15 minutes

NPA=negative percent agreement;
PPA=positive percent agreement.

*A negative result does not rule out COVID-19 infection and should not be used as the sole basis for treatment or patient management decisions, including infection control decisions. A negative result should be considered in the context of a patient's recent exposures, history, and the presence of clinical signs and symptoms consistent with COVID-19, and confirmed with a molecular assay, if necessary, for patient management. For additional information, please refer to the HCP fact sheet.
